Profile Summary

Entry-level Software Development Engineer with strong fundamentals in programming, data structures, and problem-solving. Experienced in building modular applications, working with databases, and collaborating in project environments. Adaptable, quick learner, and eager to upskill across technologies to contribute to global engineering teams.

Education

KKR & KSR Institute of Technology and Sciences, Guntur

Bachelor of Technology – Computer Science and Data Science

CGPA: 7.82

Nov 2021 – May 2025

Technical Skills

Programming	Python, Java
Web Technologies	HTML, CSS, JavaScript
Databases	SQL
Tools	Git (Basics), Jupyter Notebook, Google Colab
Data & BI	Power BI, DAX (Basics)

Experience

Data Visualization Intern – Brainovision Solutions Pvt. Ltd.

Jul 2024 – Sep 2024

- Developed interactive dashboards using Power BI.
- Performed data cleaning, transformation, and modeling.
- Created DAX measures and KPIs.
- Collaborated with teams to meet business requirements.

Projects

Banking Application — Python, SQL

- Designed and developed a modular banking application based on functional requirements.
- Implemented core features including account creation, deposits, withdrawals, and transaction history.
- Integrated Python with SQL to ensure secure, consistent data storage and retrieval.
- Performed debugging, input validation, and exception handling to improve system reliability.

Road Accident Protocol System — Python, TensorFlow, CNN

- Built an intelligent accident detection system using CNN for audio-based crash recognition.
- Collected and preprocessed 10,000+ audio samples to train and evaluate the model.
- Achieved 85% accuracy and optimized model performance through iterative testing.
- Integrated Twilio and GPS services to automatically notify emergency contacts in real time.

Flipkart Product Review Scraper — Python, BeautifulSoup, Pandas

- Developed an automated web scraping solution to extract product reviews and ratings.
- Parsed dynamic web content and transformed raw data into structured datasets.
- Implemented error handling and logging to manage missing elements and runtime failures.
- Enabled downstream analysis by exporting cleaned data for sentiment and trend analysis.

Certifications

- Python for Data Science
- Java Full Stack Development
- Power BI

Core Competencies

Problem Solving • Communication • Team Collaboration • Adaptability • Willingness to Learn
